

STUDENT FIRST AID PROCEDURES

Students....if you feel faint while in the laboratory

- Sit down
- Put your head down between your knees
- Stay in this position until the feeling passes

If you continue to feel faint

- Have a classmate alert the TA to your condition

Students....if you see someone who is feeling faint

- Have them sit down
- Have them put their head between their knees
- Alert the TA to their condition
- If the feeling passes, assist them to the hallway

If a student feels faint

- DO NOT force them to their feet or raise their head or torso at all
- Alert the TA or someone who knows CPR to attend to them
- Have the TA or a member of the Biology Department personnel call 9-911
