

Summer Consulting Intern - Energy and Resources - Commodity Trading

This internship will involve on-site client engagement and work from our base office location. The internship is designed to provide professional development by the way of skill building in research, writing, problem-solving, analysing, interpersonal communication, and teamwork.

Detailed Job Description:

1. Consulting Engagements and Project Support (20%)
 - Assist project teams in various consulting engagements, including developing deliverables, designing, and executing data-driven strategies, and solving complex business problems
 - Provide support to project managers in the organization and tracking of project timelines, milestones, and deliverables
2. Presentations and Internal Initiatives (15%)
 - Develop and deliver presentations, synthesize research findings and analysis results, and create visual aids
 - Engage in firm initiatives, professional development, and knowledge sharing activities
3. In-depth Research and Analysis (15%)
 - Conduct comprehensive market research and data analysis to understand clients' industries, competitors, and target markets
 - Evaluate industry trends, customer preferences, regulatory changes, and financial, operational, and strategic performance of client organizations and their competitors
4. Trading Technology and Data Analytics (15%)
 - Participate in trading business and IT transformation projects, data analytics architecture strategy, and ETRM design and implementation
5. Project Delivery and Change Management (15%)
 - Support complex program and project delivery in trading environments, and contribute to change management initiatives for clients
6. Commercial Strategy for Trading Businesses (10%)
 - Aid in developing business and commercial strategies for energy trading organizations, and support market entry and readiness initiatives
7. Risk and Compliance Advisory (10%)
 - Contribute to risk management and compliance advisory projects for energy and commodity trading clients

By participating in these tasks and responsibilities, you will contribute to the success of our clients in the energy and commodity trading sector while developing a solid foundation in consulting methodologies, analytical techniques, and industry-specific knowledge. This internship experience will be invaluable in preparing you for a future career in consulting or any other professional fields.
